

MAURO GENNA

Product Engineer | Full Stack & AI-Powered Products

Mendoza, Argentina | gennamauro18@gmail.com | LinkedIn | GitHub | Portfolio | +54 261 697 6887

PROFESSIONAL SUMMARY

Product Engineer with 4+ years of experience building SaaS products and customer-facing applications from idea to production. Experienced in working directly with stakeholders and clients to understand business needs, translate ambiguous requirements into technical solutions, and take ownership of delivery across the full product lifecycle.

Full-stack engineer with experience across React, Next.js, NestJS, databases, and AI-powered applications. Strong track record of leading projects end-to-end—from problem discovery and technical architecture to implementation, deployment, and iteration. Recently focused on AI-powered products, including agentic systems, conversational voice applications, and LLM integrations.

EXPERIENCE

Founder & Full Stack Engineer | Personal Venture

Arnie | Remote / Mendoza, Argentina | May 2026 – Present

- **Built from customer problem to product:** Founded and built an AI platform for SMBs, taking ownership from problem discovery and customer conversations through architecture, implementation, and go-to-market.
- **End-to-end product development:** Designed and developed the full platform across backend, frontend, databases, AI pipelines, and integrations using NestJS, Next.js, and PostgreSQL.
- **Customer-driven development:** Shape product decisions around real SMB workflows and customer needs, translating business problems into AI-powered automation across WhatsApp, voice, and web chat.
- **AI product architecture:** Built conversational AI agents and retrieval pipelines, integrating OpenAI function calling, Retell AI, and ElevenLabs to enable agents to execute real business actions.
- **Product and business ownership:** Own the full lifecycle, including technical architecture, development, product decisions, customer acquisition, and direct sales.

Full Stack Engineer | AI-Focused Projects

UseTeam | Spain (Remote) | April 2025 – Present

- **End-to-end product ownership:** Lead projects from initial client conversations and requirement discovery through technical architecture, implementation, and production delivery.
- **Client collaboration:** Work directly with clients and stakeholders to understand business needs, clarify ambiguous requirements, and translate them into practical product and technical solutions.
- **AI product delivery:** Key contributor in a team of 4 engineers delivering AI-powered MVPs for international clients across multiple industries, shipping 5+ products from concept to production.
- **AI voice product:** Designed and implemented an AI voice assistant for property management serving 50+ residential communities in Spain, automating incident reporting and administrative workflows.
- **Technical decision-making:** Drive architecture and implementation decisions while balancing client requirements, delivery speed, product scope, and long-term maintainability.

Software Engineer

Highpoint Growth Networks | United States (Remote) | April 2023 – April 2025

- **End-to-end product delivery:** Owned the delivery of product features across database design, backend services, frontend applications, and production rollout for a SaaS ad-tech platform.
- **Product ownership at scale:** Core engineer in a 5-person development team building and evolving a production platform supporting thousands of active screens across hundreds of venues and advertisers nationwide.
- **Platform redesign:** Led the redesign of the platform's frontend architecture, making key technical decisions to improve scalability, maintainability, and the ability to ship new product capabilities faster.
- **Billing migration:** Architected and executed the migration from an external billing provider to an in-house subscription system, moving hundreds of active subscriptions while maintaining billing continuity and data integrity.
- **AI-powered workflows:** Designed and implemented a multi-agent AI system with role-based permissions and human-in-the-loop execution.

Frontend Developer

Synergiart SL | Spain (Remote) | April 2022 – April 2023

- **Design-to-code implementation:** Built customer-facing web applications by translating Figma designs into responsive, production-ready interfaces.
- **Frontend development:** Developed reusable frontend components and application interfaces using React and Tailwind CSS across multiple projects.
- **State and data integration:** Implemented application state management with Zustand and integrated frontend applications with MongoDB-backed data systems.
- **Client project delivery:** Collaborated across multiple projects, adapting implementations to product requirements and delivering functional user experiences from design to production.

TECHNICAL & PRODUCT SKILLS

Product Engineering: End-to-End Ownership · Requirements Discovery · Stakeholder Collaboration · Client-Facing Development · Technical Decision-Making · MVP Development · Product Delivery

AI & Intelligent Products: OpenAI API · Function Calling · AI Agents · LLM Integrations · Retell AI · ElevenLabs · Conversational AI · Voice Automation · RAG

Full Stack Development: TypeScript · JavaScript · React · Next.js · Node.js · NestJS · Tailwind CSS · Zustand

Databases & Infrastructure: PostgreSQL · MongoDB · SQL · REST APIs · Vercel · AWS · Railway

Systems & Architecture: Technical Architecture · Database Design · SaaS Platforms · Payment Systems · Subscription Systems · Scalable Frontend Architecture

EDUCATION

Full Stack Web Development — Henry Bootcamp | 2023

Frontend Development — NextU | 2022

LANGUAGES

Spanish — Native | English — Professional Working Proficiency | Italian — B1 (CILS Certification)
