

# MAURO GENNA

## Product Engineer | Full Stack & AI-Powered Products

[gennamauro18@gmail.com](mailto:gennamauro18@gmail.com) | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Mendoza, Argentina | +54 261 697 6887

---

Product Engineer building AI-powered SaaS products end-to-end, from the first customer conversation through architecture, build, and go-to-market. I founded and run Arnie, an AI agent platform for SMBs, owning everything from technical decisions to direct sales. Before that, I led AI-focused client projects at UseTeam in Spain and shipped production features on an ad-tech platform at Highpoint Growth Networks in the US, working directly with stakeholders to turn ambiguous requirements into real products. Core stack: NestJS, Next.js, PostgreSQL — recent focus on agentic AI systems, voice pipelines, and LLM integrations.

## EXPERIENCE

---

### Founder & Full Stack Engineer

Arnie ([arniechat.com](#)) | Remote / Mendoza, Argentina | May 2026 – Present

- **Built from customer problem to product:** Founded and built an AI platform for SMBs, taking ownership from problem discovery and customer conversations through architecture, implementation, and go-to-market.
- **End-to-end product development:** Designed and developed the full platform across backend, frontend, databases, AI pipelines, and integrations using NestJS, Next.js, and PostgreSQL.
- **Customer-driven development:** Shape product decisions around real SMB workflows and customer needs, translating business problems into AI-powered automation across WhatsApp, voice, and web chat.
- **AI product architecture:** Built conversational AI agents and retrieval pipelines, integrating OpenAI function calling, Retell AI, and ElevenLabs to enable agents to execute real business actions.
- **Product and business ownership:** Own the full lifecycle, including technical architecture, development, product decisions, customer acquisition, and direct sales.

### Full Stack Engineer | AI-Focused Projects

UseTeam | Spain (Remote) | April 2025 – Present | concurrent independent contractor engagement

- **End-to-end product ownership:** Lead projects from initial client conversations and requirement discovery through technical architecture, implementation, and production delivery.
- **Client collaboration:** Work directly with clients and stakeholders to understand business needs, clarify ambiguous requirements, and translate them into practical product and technical solutions.
- **AI product delivery:** Key contributor in a team of 4 engineers delivering AI-powered MVPs for international clients across multiple industries, shipping 5+ products from concept to production.
- **AI voice product:** Designed and implemented an AI voice assistant for property management serving 50+ residential communities in Spain, automating incident reporting and administrative workflows.
- **Technical decision-making:** Drive architecture and implementation decisions while balancing client requirements, delivery speed, product scope, and long-term maintainability.

### Software Engineer

Highpoint Growth Networks | United States (Remote) | March 2024 – August 2026 | concurrent independent contractor engagement

- **End-to-end product delivery:** Owned the delivery of product features across database design, backend services, frontend applications, and production rollout for a SaaS ad-tech platform.
- **Product ownership at scale:** Core engineer in a 5-person development team building and evolving a production platform supporting thousands of active screens across hundreds of venues and advertisers nationwide.
- **Frontend leadership:** Led the platform's frontend — architecture and UX/UI — reworking the existing product surface and directing the design of new features, while making the technical decisions that improved scalability, maintainability, and delivery speed.
- **Billing migration:** Architected and executed the migration from an external billing provider to an in-house subscription system, moving hundreds of active subscriptions while maintaining billing continuity and data integrity.
- **AI-powered workflows:** Designed and implemented a multi-agent AI system with role-based permissions and human-in-the-loop execution.

## Frontend Developer

Synergiart SL | Spain (Remote) | April 2023 – March 2024

- **Design-to-code implementation:** Built customer-facing web applications by translating Figma designs into responsive, production-ready interfaces.
- **Frontend development:** Developed reusable frontend components and application interfaces using React and Tailwind CSS across multiple projects.
- **State and data integration:** Implemented application state management with Zustand and integrated frontend applications with MongoDB-backed data systems.
- **Client project delivery:** Collaborated across multiple projects, adapting implementations to product requirements and delivering functional user experiences from design to production.

## TECHNICAL & PRODUCT SKILLS

---

**Product Engineering:** End-to-End Ownership, Requirements Discovery, Stakeholder Collaboration, Client-Facing Development, Technical Decision-Making, MVP Development, Product Delivery

**Product & Interface:** UX/UI Ownership, Design Systems, Figma to Production, Component Architecture, Design-Engineering Collaboration

**AI & Intelligent Products:** OpenAI API, Function Calling, AI Agents, LLM Integrations, Retell AI, ElevenLabs, Conversational AI, Voice Automation, RAG, Claude Code

**Full Stack Development:** TypeScript, JavaScript, React, Next.js, Node.js, NestJS, Tailwind CSS, Zustand

**Databases & Infrastructure:** PostgreSQL, MongoDB, SQL, REST APIs, Vercel, Railway, AWS

**Systems & Architecture:** Technical Architecture, Database Design, SaaS Platforms, Payment Systems (Creem), Subscription Systems, Scalable Frontend Architecture

## EDUCATION

---

Full Stack Web Development — Henry Bootcamp (2023) Intensive program focused on modern web application development and agile collaboration.

Frontend Development — NextU (2022) Training in React-based frontend engineering.

## LANGUAGES

---

Spanish — Native | English — Professional Working Proficiency | Italian — B1 (CILS Certification)
